

Assignment: Map ONE of Thomson's objections to this line of argument and ONE objection of your own. You may use the text box of the assignment to further explain the objection of your own that you map here. Note: please follow Thomson in assuming 2.1 for the sake of argument. Her objection will be (and yours also should be) to 1) the inference from 3.1 to 2.2, or 2) 3.1 (or to premises offered in support of 3.1).
